

SMS REQUEST FORM

This form is intended for use by US Army, Corps of Engineer (USACE) personnel for the express purpose of requesting copies of software (portions of which are proprietary) developed through a joint effort of a consortium of participants. The federal consortium agencies for SMS are:

US ARMY CORPS OF ENGINEERS (USACE)

Only members of the federal consortium may use this form to request the software. On-site contractors to these federal agencies are permitted to use the software only for projects directly funded by a consortium member. The term "on-site contractor" means that the contractor must be physically located at a site owned by a consortium member and engaged solely in US government, Department of Defense (DoD) business. Requests for software for on-site contractors must be made by a representative from the federal consortium.

INSTRUCTIONS

Request SMS For USACE Use:
